

**INCIDENT MANAGEMENT SITUATION REPORT
SATURDAY, NOVEMBER 1, 2003 – 0800 MST
NATIONAL PREPAREDNESS LEVEL 3**

CURRENT SITUATION:

Initial attack activity was light nationally, with 43 new fires reported. Three large fires were contained, one in the Rocky Mountain Area and two in the Eastern Great Basin Area. Very high to extreme fire indices were reported in Arizona, California and Utah.

SOUTHERN CALIFORNIA AREA LARGE FIRES:

A Unified Area Command has been established between a National Area Command Team (Mann), the California Department of Forestry & Fire Protection (Heili) and the San Bernardino County Fire Department (Wurl) to manage the Old and Grand Prix fires. A Unified Area Command has been established between the California Department of Forestry & Fire Protection (Turner) and the Forest Service (Hatcher) to manage the Cedar and Paradise fires.

OLD, San Bernardino National Forest. A Unified Command has been established between two Type 1 Incident Management Teams (Mortier and Cable), a Type 2 Incident Management Team (Wendt) and local fire agencies. This fire is in chaparral on the north side of San Bernardino, CA. Active fire behavior on uncontrolled perimeters with minimal fire activity in other areas was reported.

GRAND PRIX, San Bernardino Unit, California Department of Forestry & Fire Protection (CDF). A Unified Command has been established between a Type 1 Incident Management Team (Studebaker) and local fire agencies. This fire is in heavy chaparral, two miles west of Mira Loma, CA. Minimal fire activity occurred due to higher relative humidity and cooler temperatures. Mandatory evacuation orders remain in effect for Silverwood Lake and the East end of Summit Valley.

CEDAR, Cleveland National Forest. A Unified Command has been established between a Type 1 Incident Management Team (Lohrey) and a California Department of Forestry & Fire Protection Type 1 Incident Command Team (Hawkins). This fire is in chaparral, ten miles east of Ramona, CA. Minimal fire activity occurred due to continued higher relative humidity and cooler temperatures. Threatened residences and commercial properties have been evacuated and structure protection is a priority.

PARADISE, Monte Vista Unit, California Department of Forestry & Fire Protection (CDF). A CDF Type 1 Incident Command Team (Snell) is assigned. This fire is in heavy chaparral, six miles northeast of Escondido, CA. Fire activity continued in areas that did not receive rain. Structure protection is in place for numerous residences.

SIMI INCIDENT, Ventura County. A Unified Command between a CDF Type 1 Incident Command Team (Haines), Ventura County Fire Department (Sanchez), Los Angeles County (Osby) and the City of Los Angeles (West) is in place. This fire is in chaparral and grass, five miles north of Simi Valley, CA. Moderate fire activity was observed on southwest facing slopes until mid afternoon when rain was received.

PIRU, Los Padres National Forest. A Unified Command has been established between a Type 1 Incident Management Team (Vail) and a California Department of Forestry & Fire Protection (CDF) Type 1 Incident Command Team (Kerrigan) is assigned. This fire is in grass and brush, 14 miles northwest of Santa Clarita, CA. Minimal fire activity was observed due to continued higher relative humidity and rain in the fire area.

PADUA, Angeles National Forest. This fire is in chaparral, six miles north/northeast of Claremont, CA. No new information was reported.

PARADISE 2, Sequoia & Kings Canyon National Park. This wildland fire is in mixed conifer and chaparral, seven miles northeast of Three Rivers, CA. No new information was reported. This will be the last report unless new information is received.

OUTLOOK:

Weather Discussion: A cold front with precipitation will stretch from the Great Lakes across the central states into southern California. A low pressure system remains parked over the West with high pressure centered over the Southeast.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
SOUTHERN CALIFORNIA AREA Partly to mostly cloudy with scattered showers mainly in the morning. The snow level will be around 5,000 feet.	55 to 65 coastal areas. 35 to 50 mountains. 55 to 65 valleys. 45 to 60 upper desert. 60 to 75 low desert.	30 to 50% desert. 50 to 70% mountains. 50 to 70% valleys. 50 to 70% coast.	South to southwest 15 to 25 with higher gusts over the mountains and deserts, otherwise local south to southwest 10 to 20 mph.
NORTHERN CALIFORNIA AREA Mostly Sunny with a few clouds over the mountains.	40s to lower 60s	22 to 40%	Northeast to southeast 5 to 15 mph
ROCKY MOUNTAIN AREA Areas of light snow or flurries, except mixed rain and snow over the lower elevations.	Highs 35 to 55.	40 to 65%.	Easterly 5 to 18 mph over the Colorado Front Range and northern and eastern Rocky Mountain Area, with a southwest flow of 15 to 25 mph over west-southwest Colorado.
EASTERN GREAT BASIN AREA Idaho, Bridger-Teton: Partly to mostly cloudy and cold with light winds. A slight chance of snow showers in the mountains of Idaho, and snow showers likely over the Bridger-Teton and southeast Idaho. Utah, Arizona Strip: Cold with rain or snow likely, mainly in the mountains and north. Windy over southern Utah.	Idaho, Bridger-Teton: 25 to 35 mountains, 35 to 47 valleys. Utah and Arizona Strip: 25 to 45 northern Utah, 40 to 60 southern Utah and the Arizona Strip.	Idaho, Bridger-Teton: 20 to 48% valleys, 25 to 65% mountains. Utah, Arizona Strip: 25 to 65%	Idaho, Bridger-Teton: upslope 5 to 10 mph. Utah, Arizona Strip: upslope 5 to 15 mph over northern Utah. Southwest 20 to 30 mph over southern Utah and the Arizona Strip.

BUILDING FIRELINE DOWNHILL WITH FIRE BELOW

As a general rule, construct line moving uphill. Many firefighters have lost their lives attacking wildland fires from above. If there is no practical alternative to constructing line downhill, proceed only after weighing the following considerations:

- Has the area been scouted for fire perimeter and behavior? Discuss what you need to know about the fire perimeter and fire behavior before building fireline downhill with fire below.
- Will wind direction be at your back? Will it stay at your back? Talk about how winds can change when you are on a slope (e.g., time of day, upslope and downslope breezes, etc.).
- Is the area free of chimneys and gullies? How would you negotiate your line location if there were chimneys and gullies below where you needed to be working?
- Are there adequate safety zones and escape routes as you progress downhill? How do you maintain adequate safety zones and escape routes as you progress downhill?
- Can you carry your burnout downhill as you go to provide an anchor point and safety zones? Discuss how you decide when to carry the burnout with you or wait until you have tied in down below.
- Have lookouts been posted? What do the lookouts need to be on the watch for?
- Do you have good communications, especially with lookouts and crews working towards you? What are some of the dangers of not communicating with lookouts and crews working towards you? What are the benefits of maintaining good communications?
- Can the line be completed and burned out before the fire reaches the line? Discuss how this would affect where you locate the line.
- Do you have adequate resources to complete the assignment? What additional resources might you need to safely take on an assignment that includes building fireline downhill with fire below?
- Is aerial support available if needed? What benefits can aerial resources provide? What might be an added danger from aerial resources in this type of situation? (Common Denominators)
- Has everyone been briefed on the assignment, fire behavior, weather, communications, escape routes and safety zones, hazards and tactics? Discuss who might provide this briefing and where and when it might occur.
- To reduce the risks:
 - If the answer is “no” to any of these questions, consider other tactics and provide for safety first.
 - Never compromise escape routes to safety zones for the sake of building line. Remind everyone that a situation check is each and every firefighter’s right and responsibility.
